### ANCIENT CLASSIC

#### The Cranial Contour Facial (面部顱骨輪廓重塑療程)

The Cranial Contour Facial is a holistic treatment that utilizes the gentle principles of craniosacral therapy. Your therapist employs a subtle touch to sense the rhythm of the cranial system, releasing fascial stress to support the body's innate self-regulating and healing capabilities. This profound release not only promotes deep relaxation but also visibly reduces facial swelling, sculpts a more defined V-shape, and brightens the complexion. To conclude and enhance the results, an optional LED light therapy session is available. For a truly transformative experience, we recommend pairing this facial with our Rebalance Impulse session for optimal mind-body harmony.

### ANCIENT CLASSIC

#### Bojin Massage and Lifting Facial (拔筋緊緻面部提拉療程)

This is a transformative treatment rooted in traditional technique, designed to go beyond superficial massage. By penetrating specific muscle layers and meridian points, it effectively releases deep-seated blockages to restore optimal blood flow and awaken the skin's innate regenerative capabilities. This powerful process works to reset your complexion's natural "reborn" mechanism, delivering profound firming, lifting, and revitalizing results. The treatment is elevated with an optional LED red light therapy session to further enhance regeneration and illuminate the skin, leaving you with a visibly sculpted and radiant rebirth.
